

An Advanced Biowar Event That Will Be Bigger Than 9/11

On 23rd April 2009 the world began to become aware of a very strange new version of swine flu H1N1 in Mexico with limited cases in Texas and California. By the morning of the 24th of April, we began hear that there were hundreds of sick and 20 or so dead. By late in the day, we have learned that over 1,000 are now reported ill and over 60 are reported dead. There are solid reasons to suspect that this new Mexican Swine Flu is NOT a naturally occurring event but instead is an Advanced Biological Warfare recombination DNA genetically engineered virus.

Here is what we know of the virus so far. This virus has already gone international having crossed the border from Mexico to America. All schools in Mexico City have been canceled, millions of students told to stay home due to Mexican Swine Flu. Sick victims of this strange new virus are currently reported in California and Texas. Over 60 deaths reported in Mexico (could be substantially higher considering the state of Mexican health care and reporting).

Young healthy adults seem to be the most at risk. This is similar to the deadliest killer flu in history, Spanish Flu in 1918. Most if not all nations with advanced biological warfare programs have been interested in recreating the Spanish Flu DNA sequence and several are reported to have done so.

The new Mexican Swine Flu has elements of DNA from the following: avian flu, human flu Type A, human flu Type B, Asian swine flu, and European swine flu. A strange combination never seen before and having less than 1/10% chance of being a natural event. Human and animal viruses from four or more continents suddenly recombine in a new flu during a non-flu season that spreads from human-to-human with a 10% fatality rating.

Over 1,000 reported infected in Mexico; true rate may be much higher. Mexico City seems to be the epicenter of the new virus. Mexico City has 20 million citizens, most terribly poor. Mexico City is notorious for its poor sanitation and public health. "Don't drink the water" has been the byword in Mexico City for decades. It is the perfect breeding ground for an explosive growth of this new killer virus. Mexico City has closed all schools, public gatherings, public buildings. People are wearing medical masks on the streets. The government has announced a massive new emergency swine flu vaccination program that will be, at best, either totally non-effective or of very limited effect, and could be, at worst, a deadly option for patients. It is thought that the authorities are trying to contain public panic by announcing the vaccination program.

Both the World Health Organization and the US CDC (Center for Disease Control) have announced, today/24th April, that they are 'very concerned' about a global pandemic developing out of this new disease. Based on advanced biowargaming projections, it is already too late to stop the global spread of this new killer disease. Based on the three waves of Spanish Flu, the latter ones being more lethal, fatality rates may range from approximately 10% to 40% or so in later waves. More people could die in America, Mexico, Canada, Europe, and globally from Mexican Swine Flu than died in World War II.

This new flu is likely a lab-created, genetically engineered virus that either: (1) Escaped accidentally from a lab; or (2) was deliberately released by a nation or non-state organization or a well-trained individual. [Click here](#) for several news items.

If there is a positive side to this coming global disaster, it may force governments to quickly come to grips with containing advanced biowar attacks. This is of considerable short term importance as Israel is apt to attack Iran by no later than mid-July 2009. The Iranians, having hired a large number of key ex-Soviet advanced biowar scientists 18 years ago and having spent billions on their asymmetrical MAD (mutually assured destruction) counter-force, are expected to respond to any significant attack on Iran with a biowar attack on Israel, North America, and Europe using in-place agents and dozens of genetically engineered viruses, many with very high projected kill rates.

This event is an advanced biological warfare event. It is far more important than 9/11 and, by itself, could bring deaths in such magnitudes as to exceed the number of deaths from all causes in the Second World War.

Article from OpEdNews.com

Note from ozchurch.net Editor : In our second part of the Panel series "New World Order Is Not A Conspiracy" we warned viewers about a global elite design for 'Planned Population Reduction'.

Of course, most people would have written us off as being on the 'loon fringe' for suggesting such conspiratorial madness.

But when the news media starts talking openly about the possibility of 'manufactured viruses' that could develop into a pandemic – we find ourselves not looking quite so 'loony' after all.

Remember that there is nothing new under the sun. The psalmist wrote in Psalm 83 that 'the kings of the earth conspire against God'.

But in all of this, God is still in control, and sovereign over all these events. There is never any cause for believers to 'panic'.

All the events of the book of Revelation must come to pass, as they are prophesied. Christians can face these events with confidence, knowing that we are covered by the blood of our loving saviour, the Lord Jesus Christ.

So as the prophecies of Daniel, Ezekiel, John etc unfold, we have surety in knowing that God is still in control, and perfect love conquers all fear.
